These similarities have caused many researchers from different walks to believe that the experience is one and the same, with RA naturally being the more believable likelihood. The idea is put forth that those with alien abduction stories are/were really victims of a more "normal" type of abuse, and the alien abduction testimony is a sort of "screen memory," either brought about by psychological conditioning (ie, exposure to popular media), suggestion of the (ahem) therapist, or actually placed by the perpetrators hypnotically to cover their actions.

However, critical comparison of this data reveals that an enormous amount of differences also appear, which equally cannot be ignored.

We believe that the events are actually two entirely different experiences, but with the same author. While we do not believe true space aliens are the perpetrators (See [In A Nutshell](#)), many "alien" abduction scenarios have a much more spiritual basis and "use of non-human resources" than most SRA cases. However, the similarities reveal beyond a shadow of doubt that the methodology shares the same original source and goal (torment and programming of the individual, destruction of faith in God), although RA perpetrators are not always Satanists. (A small percentage of people who have contacted us can share distinct testimonies of being victims of both crimes, establishing a further link to the spiritual root beyond "method of operation.")

Be encouraged that both experiences can be ended and healed with proper counseling. The above charts may be helpful in ascertaining your need. Use our pages for info about abductions, or refer to [HERE](#) to begin a search for experiencers, survivors and ministers who specialize in recovery for ritualistic abuse victims.
